

ADVANCED STROKE EMERGENCY SUPPORT

EMERGENCY MEDICAL SERVICES

EMS is the first line of care for stroke patients.

Current stroke education and the understanding of stroke scales and regional protocols is paramount for the improved outcomes of stroke patients.

This course will expand your knowledge on:

- Types of Stroke & Risk Factors
- Prehospital Triage
- Stroke Detection Scales
- Warning Signs & Symptom
- Stroke Severity Scales
- Treatment Options
- Bypass & Transfer Protocols

To help increase the stroke treatment network, this course is appropriate for:

- First Responders
- Emergency Medical Technicians
- Fire Fighters
- Police Officers
- Paramedics
- Nurses
- Physicians
